

THE WHEEL OF FATE

1. Print this page out on cardstock.
2. Cut out the wheel and spinner.
3. Glue the wheel to a 6"x6" piece of cardboard or foamcore.
4. Use a thumbtack to make a hole in the tiny white space in the spinner. Make sure the hole is slightly larger than the thumbtack's pin, so the spinner can turn easily without resistance.
5. Push the thumbtack through the spinner into the hole in the wheel's center.
6. Fold up the end of the spinner so you can flick it easily to turn it.
7. Spin your fate!
